

Apple TV Closed Captions

Last month we discussed how to add Subtitles to broadcasts and movie services.

For broadcast TV, I'm using YouTubeTV, so your instructions may vary. With YouTubeTV, using the remote swipe down from the top, you'll get options, move the highlight to the 3 dots on the right and click. Now you have a few icons, move to the CC icon and click, now you have several options for closed captioning, you can choose between CC1 & CC3. You can change the CC font, color, size, background color & opacity.

For Netflix or Prime, the Closed Caption selection is accessed by swiping down from the top of the remote and selecting the subtitles option, now you can choose the language, this will vary depending on the movie or series.
