

## Saved by Two Step Authentication

Kathy: someone in Africa tried to hack my Apple Account. I just signed out of all my devices and changed all passwords for me and my husband.

Roy: How did you find out?

Kathy: Apple sent a message someone was trying to access my account from Anhi Huawei. I clicked Deny Access and changed my passwords. Do you think I am ok?

Roy: Yes. So you had Two Step Authentication on?

Kathy: Yes

Roy: What bothers me more is how did they get your PassCode in the first place.
